

# Flickr Image Search App Documentation

## Technologies used

1. React

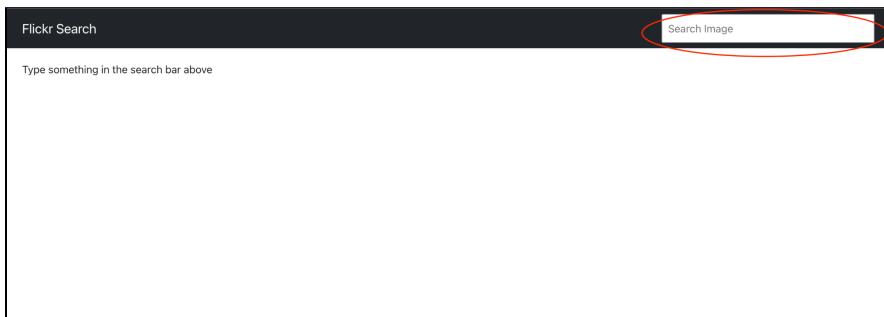

## Steps to run the application locally

1. To install dependencies, run: **npm install**
2. To run the application, run: **npm start**
3. Open up a browser tab and load **http://localhost:3000/**

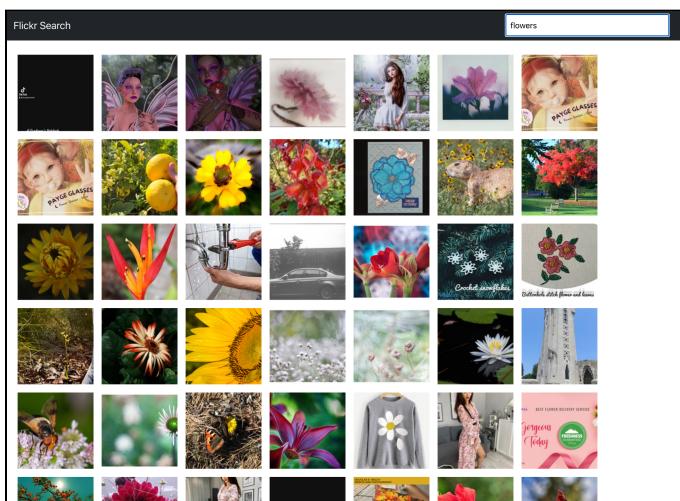

Note: Please ensure that port 3000 is not being used by any other service

## How to use the search tool

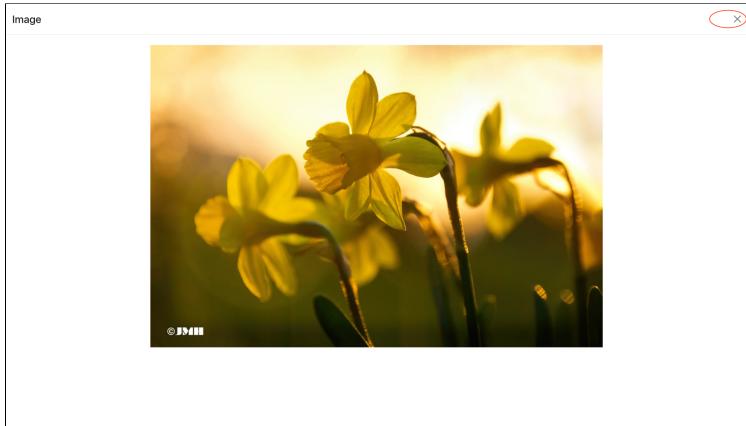

1. Begin by typing in the search bar on top right corner of the screen

2. View a list of images

3. Click an image to view it in a modal. Use the cross button in top right of the page to exit the modal

4. Scroll to the bottom of the page to load more images.
5. If there is an API failure in getting data, the following message is displayed
